INDEPENDENT AUDITORS' REPORT

September 17, 2019

Honorable Mayor and Members of the City Council City of Belding, Michigan

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the City of Belding, Michigan, (the "City") as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the discretely presented component unit, each major fund, and the aggregate remaining fund information of the City of Belding, Michigan, as of June 30, 2019, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 3 through 8 and the information on pages 43 through 50 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City's basic financial statements. The combining and individual fund financial statements and schedules, and statistical section, are presented for purposes of additional analysis and are not a required part of the financial statements.

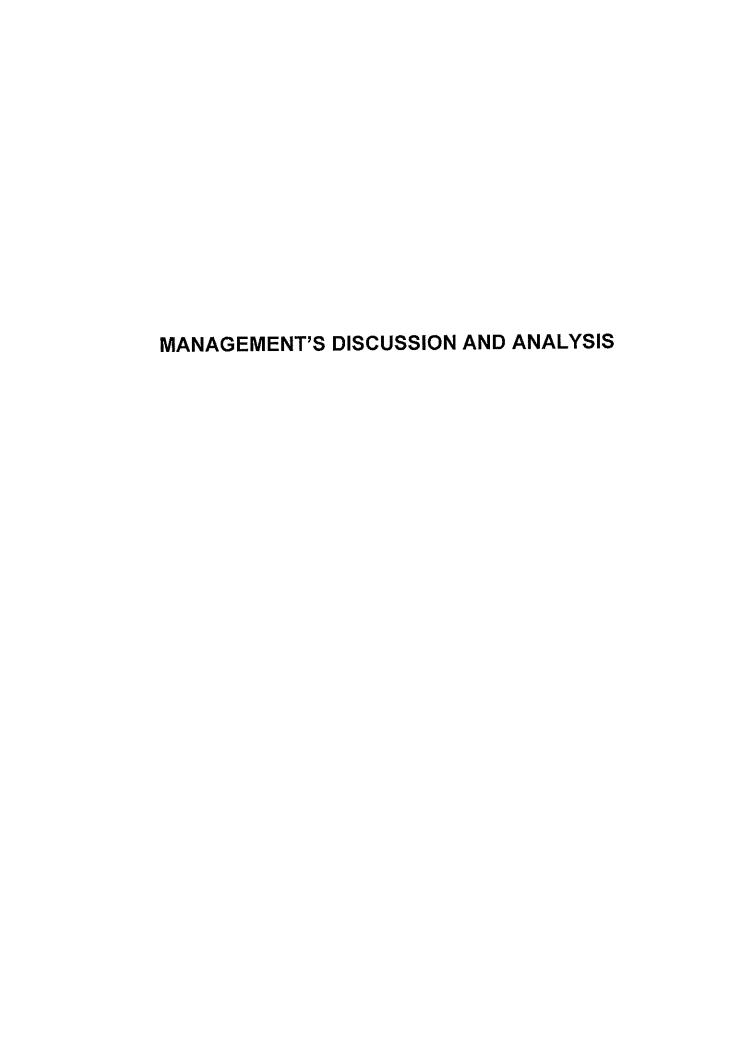

The combining and individual fund financial statements and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual fund financial statements and schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The statistical section has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated September 17, 2019, on our consideration of the City's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

Management's Discussion and Analysis

As management of the City of Belding (the City), we offer readers of the City's financial statements this narrative overview and analysis of the financial activities of the City for the fiscal year ended June 30, 2019. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal.

Financial Highlights

The financial statements, which follow this Management's Discussion and Analysis, provide these significant key financial highlights for the 2018-19 Fiscal Year as follows:

- Governmental and business-type activities repaid approximately \$326,000 of long-term debt.
- Governmental activities added approximately \$470,000 of capital asset which included primarily infrastructure improvements.
- Net position of governmental activities increased \$85,962 while net position of business type activities increased by \$153,500.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the City's basic financial statements. The City's basic financial statements comprise three components: 1) Government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements - The Government-wide financial statements are designed to provide readers with a broad overview of the City's finances, in a manner similar to a private-sector business.

The statement of net position presents information on all of the City's assets and liabilities, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the City is improving or deteriorating.

The statement of activities presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected revenues and earned but unused compensated absences).

Both of the government-wide financial statements distinguish functions of the City that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the City include general government, public safety, public works and streets, and culture and recreation. The business-type activities of the City include Dial-a-Ride, Sewer, and Water.

The government-wide financial statements include not only the City itself (known as the primary government), but also a legally separate Downtown Development Authority (DDA) for which the City is financially accountable. Information for the component unit is reported separately from the financial information presented for the primary government itself.

Fund financial statements - A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the City can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds - Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a City's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the City's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the following major funds: the general, major streets, local streets and library funds. Data is combined into a single aggregated presentation for the other governmental funds. Individual fund data for each of the non-major governmental funds is provided in the form of combining statements and schedules elsewhere in this report.

The City adopts an annual appropriated budget for its general fund and all special revenue funds. A budgetary comparison statement has been provided for the budgeted funds to demonstrate legal compliance.

Proprietary funds - The City maintains two different types of proprietary funds. Enterprise funds are used to report the same functions presented as business-type activities in the government-wide financial statements. The City uses enterprise funds to account for its Dial-a-Ride (Transit), Sewer, and Water operations. Internal service funds are an accounting device used to accumulate and allocate costs internally among the City's various functions. The City uses internal service funds to account for its supplies and professional fees, building and ground maintenance, fleet of vehicles, and insurance. Because these services predominantly benefit governmental rather than business-type functions, they have been included within governmental activities in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the Sewer, Water, and Dial-A-Ride operations, all of which are considered to be major funds of the City. All internal service funds are combined into a single, aggregated presentation in the proprietary fund financial statements. Individual fund data for the internal service funds is provided in the form of combining statements elsewhere in this report.

Fiduciary funds - Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statement because the resource of those funds is not available to support the City's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

Notes to the financial statements - The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Other information - In addition to the basic financial statements and accompanying notes, this report also presents certain supplementary information. This is limited to this discussion and analysis, required supplementary information, combining statements and schedules, and statistical information.

Government-wide Financial Analysis

Statement of Net Position - As noted earlier, net position may serve over time as a useful indicator of a City's financial position. In the case of the City, assets exceeded liabilities by \$23,720,911 at the close of the most recent fiscal year. The following chart illustrates the composition of net position.

City of Belding's Net Position

	····		***************************************			
	Governmenta	al Activities	Business-typ	<u>e Activities</u>	<u>Tot</u>	<u>al</u>
	2019	2018	2019	2018	2019	2018
Assets						
Current and other assets	\$ 3,903,018	\$ 3,658,732	\$ 2,879,053	\$ 2,518,728	\$ 6,782,071	\$ 6,177,460
Capital assets	12,882,251	13,100,657	9,337,686	9,676,745	22,219,937	22,777,402
Total assets	16,785,269	16,759,389	12,216,739	12,195,473	29,002,008	28,954,862
Deferred outflows	262,645	173,082	_	4	262,645	173,082
Liabilities						
Current liabilities	122,664	138,278	51,780	46,622	174,444	184,900
Long-term liabilities	3,762,658	3,694,989	1,606,640	1,744,032	5,369,298	5,439,021
Total liabilities	3,885,322	3,833,267	1,658,420	1,790,654	5,543,742	5,623,921
Deferred inflows	<u>.</u>	22,574	_			22,574
Net position						
Net invested in capital						
assets	11,106,040	11,177,526	7,798,045	7,957,854	18,904,085	19,135,380
Restricted	1,988,227	2,211,601	213,068	213,068	2,201,295	2,424,669
Unrestricted	68,325	(312,497)	2,547,206	2,233,897	2,615,531	1,921,400
Total net position	\$13,162,592	\$13,076,630	\$10,558,319	\$10,404,819	\$23,720,911	\$23,481,449

By far the largest portion of the City's net position in the amount of 80% reflects its investment in capital assets (e.g., land, buildings, machinery and equipment and infrastructure), less any related debt used to acquire those assets that is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the City's net position in the amount of 9% represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net position in the amount of \$2,615,531, or 11%, may be used to meet the City's ongoing obligations to citizens and creditors.

At the end of the current fiscal year, the City reported position net position in the governmental activities and business-type activities.

Statement of Activities - The City's total revenue for the fiscal year ended June 30, 2018, was \$7,443,104. The total cost of all programs and services was \$7,203,642. This results in a net position increase of \$239,462. The following table presents a summary of the changes in net position for the fiscal year ended June 30, 2019.

Increase (decrease) in net position	85,96	2	(158,634)	153,500	335,302	239,462	176,66
Net position – beginning	13,076,63	0	13,235,264	10,404,819	10,069,517	23,481,449	23,304,78
Net position – ending	\$13,162,59	2	\$13,076,630	\$10,558,319	\$10,404,819	\$23,720,911	\$23,481,44

Governmental Activities – Governmental activities increased the City's net position by \$85,962, due primarily to increases in the general fund and major streets funds.

Business-type Activities - Business-type activities increased the City's net position by \$153,500, due primarily to sewer water fund operating revenues in excess of expenses.

Financial Analysis of the Government's Funds

As noted earlier, the City uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds - The focus of the City's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the City's financing requirements. In particular, unassigned fund balance may serve as a useful measure of a City's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the City's governmental funds reported combined ending fund balances of \$3,066,750, a decrease of \$16,706 in comparison with the prior year.

The General Fund is the chief operating fund of the City. At the end of the current fiscal year, the General Fund reported unassigned fund balance of \$1,073,523. As a measure of the general fund's liquidity, it may be useful to compare unassigned fund balance to total fund expenditures. Unassigned fund balance represents 40% of total General Fund expenditures and transfers out.

The fund balance of the General Fund increased \$206,668 during the current fiscal year. The change in fund balance is highly dependent on the level of transfers to other funds and the level of public works staff activities in parks maintenance, community center and cemetery.

Fund balance of the major streets fund was \$928,983 an increase of \$75,874 primarily due to a new county-wide road millage.

Fund balance of the local streets fund was \$247,267 a decrease of \$29,286 primarily due to additional projects started in FY2019.

Fund balance of the library fund was \$259,506 an increase of \$43,482 primarily due to contributions in the current year.

Proprietary funds - The City's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

The Sewer and Water Funds provide service to most residents and businesses of the City.

Major Fund Budgetary Highlights

Increase to General Fund revenue due to sale of Ranney Village property purchase.

Capital Asset and Debt Administration

Capital Assets - The City's investment in capital assets for its governmental and business-type activities as of June 30, 2019, amounts to \$22,219,937 (net of accumulated depreciation). Of this amount, \$12,882,251 was for its governmental activities and \$9,337,686 was for its business-type activities. This investment in capital assets includes land, buildings and equipment, vehicles and infrastructure.

Major capital asset events during the current fiscal year included the following:

Governmental activities invested in road paving and resurfacing.

Additional information on the City's capital assets can be found in Note 5 of this report.

Long-term debt - At the end of the current fiscal year, the City had total debt outstanding of \$3,315,852. Of this amount, \$1,776,211 was reported in governmental activities and \$1,539,641 was reported in business-type activities.

Additional information on the City's long-term debt can be found in Note 8 of this report.

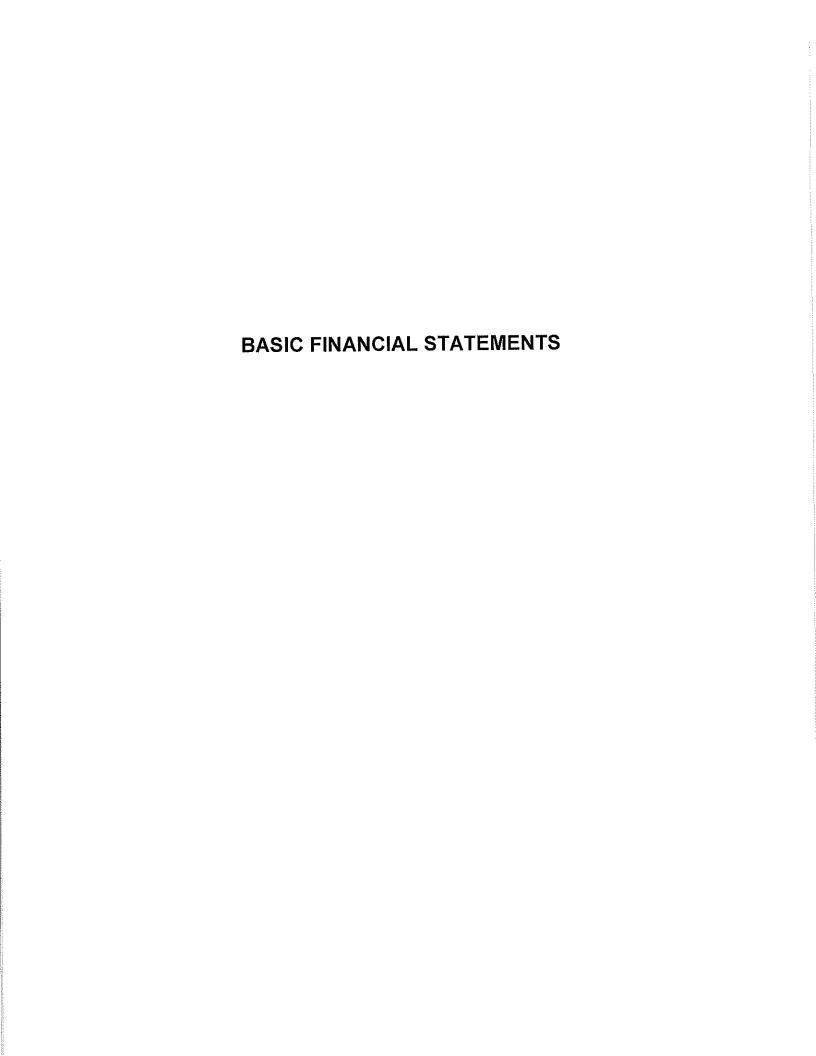

Economic Factors and Next Year's Budgets and Rates

The following economic factors were considered in preparing the City's budget for the 2019/20 fiscal year:

• Flat performance of the State of Michigan's economy and slow state funding growth.

Requests for Information

This financial report is designed to provide a general overview of the City's finances for all those with an interest in the City's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Finance Director/Treasurer, 120 S. Pleasant Street, Belding, Michigan 48809.

RECONCILIATION OF FUND BALANCE ON THE BALANCE SHEET FOR GOVERNMENTAL FUNDS TO NET POSITION OF GOVERNMENTAL ACTIVITIES ON THE STATEMENT OF NET POSITION

JUNE 30, 2019

Fund balances - total governmental funds	\$	3,066,750
Amounts reported for <i>governmental activities</i> in the statement of net position are different because		
Capital assets used in governmental activities are not current financial resources and therefore are not reported in the funds.		
Add - land Add - capital assets (net of accumulated depreciation)		1,133,694 11,143,123
Deferred pension items are not reported in the funds.		
Add - deferred outflows		262,645
Internal service funds are used by management to charge the costs of centralized costs, to individual funds. The assets and liabilities of the internal service funds are included in the governmental activities.		
Add - net position of governmental activities accounted for in the internal service funds		1,331,593
Certain liabilities are not due and payable in the current period and therefore are not reported in the funds.		
Deduct - compensated absences payable Deduct - other post-employment benefits Deduct - net pension liability Deduct - debt payable Deduct - accrued interest on debt payable		(141,654) (527,148) (1,313,566) (1,776,211) (16,634)
Net position of governmental activities	<u>\$</u>	13,162,592

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

FOR THE YEAR ENDED JUNE 30, 2019

Net changes in fund balances - total governmental funds	\$	(16,706)
Amounts reported for governmental activities in the statement of activities are different because		
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets are allocated over their estimated useful lives and reported as depreciation expense.		
Add - capital outlay Deduct - depreciation expense		629,127 (763,166)
Bond or note proceeds provide current financial resources to governmental funds in the period issued, but issuing debt increases long-term liabilities in the statement of net position. Repayment of bond or note principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net position.		
Add - principal payments on debt		146,920
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in the funds.		
Add - decrease in compensated absences Deduct - increase in other post-employment benefits Add - decrease in net pension liability Deduct - decrease in deferred outflows Deduct - increase in deferred inflows Add - decrease in accrued interest		(38,710) (1,204) (174,669) 89,563 22,574 2,263
Internal service funds are used by management to charge the costs of certain services to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities.		
Add - net income from the internal service funds		189,970
Change in net position of governmental activities	<u>\$</u>	85,962

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the City of Belding, Michigan (the "City") conform to generally accepted accounting principles as applicable to governments. The following is a summary of the significant policies.

Reporting Entity

These financial statements present the City and its component units, entities for which the City is considered to be financially accountable. Blended component units, although legally separate entities are, in substance, part of the City's operations, so data from these units are combined with data of the primary government. Discretely presented component units are reported in a separate column in the financial statements to emphasize they are legally separate from the City.

Blended Component Unit

The Belding Building Authority — The members of the governing board of the Building Authority are appointed by the City Council. The City has significant influence over operations of the Building Authority and is also accountable for its fiscal matters. The Building Authority provides services exclusively to the primary government.

Discretely Presented Component Units

The component unit column in the basic financial statements include the financial data of the Downtown Development Authority (DDA). These component unit is reported in a separate column to emphasize that it is legally separate from the City. The City also has a Local Development Finance Authority (LDFA) component unit which had no financial assets or financial activity during the year. The LDFA was formed in 1993 and the bonds related to this entity have been paid and the related projects have been completed. The members of the governing boards of these Authorities are appointed by the City Council. The budgets of these Authorities must be approved by the City Council, and the City has the ability to significantly influence their operations. Financial statements are not separately issued for the component units.

Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. Exceptions to this general rule are changes between enterprise functions and other various functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

Likewise, the *primary government* is reported separately from discretely presented *component units* for which the primary government is financially accountable.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the *economic resources measurement* focus and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements, except for agency funds which do not have a measurement focus. Revenues are recorded when earned and expenses are recorded when liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources* measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period, except for reimbursement-based grants and interest which use a one year collection period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, state revenue, grants, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the City.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the enterprise fund are charges for services. The principal operating revenues of the City's internal service funds are charges to City departments for shared costs, equipment utilization, and insurance coverage. Operating expenses for the enterprise funds include depreciation on capital assets, labor, supplies and contracted services. Operating expenses for the internal service funds include the cost of services (including claims), administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

The City reports the following major governmental funds:

The *General Fund* is the general operating fund of the City. It is used to account for all financial resources, except those required to be accounted for in another fund.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

The *Major Streets Fund* accounts for the accumulation and disbursement of resources for major street construction, maintenance and snow removal. Funding is derived primarily through Michigan Public Act 51 gas and weight taxes distributed to the City by the State of Michigan.

The *Local Streets Fund* accounts for the accumulation and disbursement of resources for local street construction, maintenance and snow removal. Funding is derived primarily through Michigan Public Act 51 gas and weight taxes distributed to the City by the State of Michigan.

The Library Fund accounts for the accumulation and disbursement of resources for Library operations. Funding is derived primarily from property taxes and court ordered penal fines.

The City reports the following major proprietary funds:

The Sewer Enterprise Fund is used to account for the operations of the City's sewer department that provides sewer services to most residents of the City on a user charge basis.

The Water Enterprise Fund is used to account for the operations of the City's water department that provides water services to most residents of the City on a user charge basis.

Additionally, the City reports the following fund types:

The *Special Revenue Funds* are used to account for the proceeds of specific revenue sources (other than permanent trusts or major capital projects) that are legally restricted to expenditures for specified purposes.

The *Debt Service Funds* are used to account for the accumulation of resources for, and payment of, long-term debt principal, interest, and related costs of governmental funds.

The *Permanent Funds* are used to account for resources that are legally restricted to the extent that only earnings, and not principal may be used for purposes that support the City programs.

The *Dial-a-Ride Transit Enterprise Fund* is used to account for the revenues and expenses related to the City-run bus service. This fund is primarily funded through State and Federal grants, contractual agreements, and passenger fares combined with a General Fund appropriation.

The *Internal Service Funds* are used to account for shared services, equipment usage, and insurance coverage provided to the City departments and funds on a cost reimbursement basis.

The Agency Funds are used to account for the collection and disbursement of property taxes that are collected on behalf of outside governments, and payroll activities for both the City and Housing Commission.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

Budgets and Budgetary Accounting

Comparisons to budget are presented for General and Special Revenue funds. General and Special Revenue funds adopt a legal budget with remaining funds maintaining budgets as a management control device. The City follows these procedures in establishing the budgetary data reflected in the financial statements:

- 1. Prior to May 1, the City Manager submits to the City Council a proposed operating budget for the fiscal year commencing the following July 1. The operating budget is adopted by activity.
- 2. Public hearings are conducted to obtain taxpayer comments.
- 3. Prior to July 1, the budget is legally enacted through passage of a resolution.
- 4. Formal budgetary integration is employed for the governmental fund types as a management control device.
- 5. Budgets for the General and Special Revenue funds are adopted on a basis consistent with generally accepted accounting principles (GAAP). Annual budgets lapse at fiscal year-end.
- 6. Adoption and amendments of all budgets used by the City are governed by Michigan state law. The appropriations resolution is based on the projected expenditures budget of the department heads of the City. Any amendment to the original budget must meet the requirements of Michigan law. Any revision that alters the total expenditures of any activity must be approved by the City Council. The City Manager is authorized to transfer budgeted amounts within an activity subject to the condition that the total expenditures do not exceed the approved appropriations by activity (department). Thus the legal level of budgetary control is at the department level. Supplemental appropriations were necessary during the year.

Cash and Cash Equivalents

For the purpose of the statement of cash flows, the City considers cash and pooled investments to be cash and cash equivalents because the pooling of these balances allows for withdrawal of these balances at any time similar to a demand deposit account. Restricted cash consists of amounts set aside in accordance with bond provisions for principal payment in the event of default.

Investments

Investments are stated at fair value at the balance sheet date.

State statutes and City policy authorize the City to invest in:

- a. Bond, securities, other obligations and repurchase agreements of the United States, or an agency or instrumentality of the United States.
- b. Certificates of deposit, savings accounts, deposit accounts or depository receipts of a qualified financial institution.
- c. Commercial paper rated at the time of purchase within the two highest classifications established by not less than two standard rating services and that matures not more than 270 days after the date of purchase.
- d. Bankers acceptances of United States banks.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

- e. Obligations of the State of Michigan and its political subdivisions that, at the time of purchase are rated as investment grade by at least one standard rating service.
- f. Mutual funds registered under the Investment Company Act of 1940 with the authority to purchase only investment vehicles that are legal for direct investment by a public corporation.
- g. External investment pools as authorized by Public Act 20 as amended.

Receivables

All receivables are recorded at their gross value and, where appropriate, are reduced by the estimated portion that is expected to be uncollectible. Uncollectible balances are immaterial to the financial statements.

Prepaid Items

Certain payments to vendors represent costs applicable to future accounting periods and are recorded as prepaid items in both the government-wide and fund financial statements.

Capital Assets

Capital assets, which include land, construction in progress, buildings and equipment, vehicles, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the governmental and business-type activities columns in the government-wide financial statements.

Capital assets are defined by the government as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are valued at cost where historical records are available and at estimated historical cost where no historical records exist. Donated capital assets are valued at acquisition value (the price that would be paid to acquire an asset with an equivalent service potential in an orderly market transaction) on the date received. The amount reported for infrastructure includes only assets added since 2003.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. Improvements are capitalized and depreciated over the remaining useful lives of the related capital assets, as applicable.

No interest expense has been incurred or capitalized on capital assets reported in proprietary funds.

Depreciation on capital assets (including infrastructure) is computed using the straight-line method over the following estimated useful lives:

<u>Years</u>
15-20
5-50
5-15
20-50
10-75

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

Long-Term Obligations

In the government-wide financial statements and proprietary fund types in the fund financial statements, the long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statements of net position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the straight-line method which approximates the effective interest method.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as expenditures.

Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Municipal Employees Retirement System (MERS) of Michigan and additions to/deductions from MERS' fiduciary net position have been determined on the same basis as they are reported by MERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Compensated Absences

Under contracts negotiated with employee groups, individual employees have a vested right to receive payments for unused vacation and sick time benefits under formulas and conditions specified in the contracts. Accumulated vacation and sick time of governmental funds is recorded on the statement of net position and not on the governmental fund balance sheets because it is not expected to be liquidated with expendable available financial resources. Amounts accumulated for proprietary funds are reported on the statements of net position of the individual enterprise funds.

Property Taxes

City property taxes are attached as an enforceable lien on property as of July 1. Taxes are levied July 1 and are due without penalty on or before August 15. These summer tax bills include the City's own property taxes and taxes billed on behalf of other taxing units within the City limits. Real property taxes not collected as of March 1 are turned over to the County for collection, which advances the City 100% for the delinquent real property taxes. Collection of delinquent personal property taxes remains the responsibility of the City Treasurer.

Property taxes levied in July of each year are recognized as revenue in that year.

Grants and Other Intergovernmental Revenues

Grants and assistance awards made on the basis of entitlement periods are recorded as intergovernmental receivables and revenue when entitlement occurs. Reimbursement-type grants are recorded as intergovernmental receivables and revenues when the related expenditure/expenses are incurred.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

Interfund Transactions

During the course of normal operations, the City has numerous transactions between funds, including expenditures and transfers of resources to provide services and to service debt. The accompanying financial statements generally reflect such transactions as transfers. Operating subsidies are also recorded as transfers.

Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/ expenditure) until then. The City has items that qualify for reporting in this category related to the net pension liability which is discussed in Note 6.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The City does not have items that qualify for reporting in this category.

Net Position and Fund Balance Reporting

Governmental funds report fund balance in the following five categories:

- Non-spendable the related asset's form does not allow expenditure of the balance. The assets
 are either (a) not in a spendable form or (b) legally or contractually required to be maintained
 intact. Nonspendable fund balance would be equal to inventory, prepaid items, non-current
 financial assets, and the nonspendable portion of endowments.
- Restricted the related assets can only be spent for the specific purposes stipulated by constitution, external resource providers, or as identified in enabling legislation.
- 3. Committed the related assets can only be spent for a specific purpose identified by formal resolution of the entity's governing board.
- 4. Assigned the related assets can only be spent for a specific purpose identified by management as authorized by the governing board.
- 5. Unassigned is the residual classification and includes all spendable amounts not contained in the other classifications.

The governing Board has not delegated the authority to assign amounts to be used for specific purpose.

Net Position and Fund Balance Flow Assumptions

Sometimes the government will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position/fund balance and unrestricted – net position/fund balance, a flow assumption must be made about the order in which the resources are considered to be applied. It is the government's policy to use restricted resources first, then unrestricted resource as they are needed. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

2. COMPLIANCE

Expenditures Over Appropriations

Michigan law provides that a local unit shall not incur expenditures in excess of the amount appropriated.

In the body of the financial statements, the City's actual expenditures and budgeted expenditures for the budgeted funds have been shown on a functional basis. The approved budgets of the City for these budgeted funds were adopted at the activity level.

During the year ended June 30, 2019, the City incurred no expenditures in budgetary funds which were in excess of the amounts appropriated.

3. CASH AND INVESTMENTS

The captions on the financial statements relating to cash and pooled investments and investments are as follows:

Cash and pooled investments Restricted cash and pooled investments	Primary <u>Government</u> \$5,652,133 213,068	Component <u>Units</u> \$21,336	Fiduciary Funds \$19,337	<u>Total</u> \$5,692,806 213,068
·	\$5,865,201	\$21,336	\$19,337	\$5,905,874

Cash and pooled investments and investments captions consist of the following at June 30, 2019:

Deposits and certificates of deposit Pooled funds and securities	\$1,632,008 4,273,316
Petty cash	<u>550</u> \$5,905,874
Total	<u> </u>

The deposits are in financial institutions located in Michigan in varying amounts. State policy limits the Treasurer's investing options to financial institutions located in Michigan. All accounts are in the name of the City and a specific fund or common account. They are recorded in City records at fair value. Interest is recorded when earned.

Custodial Credit Risk - Deposits. Custodial credit risk is the risk that in the event of a bank failure, the City's deposits may not be returned. State law does not require, and the City does not have, a policy for deposit custodial credit risk. As of year-end, \$1,286,883 of the City's bank balance of \$1,838,081 was exposed to custodial credit risk because the balance was uninsured and uncollateralized.

Investments

The City chooses to disclose its investments by specifically identifying each. As of year-end, the City had the following investments:

	<u>Maturity</u>	<u>Fair Value</u>	Rating	Source
MBIA Michigan Class	n/a	\$4,273,316	AAAm	S&P

The above investments do not include certificates of deposit which are classified as deposits for risk identification purposes.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

Investment and Deposit Risk

Interest Rate Risk. State law limits the allowable investments and the maturities of some of the allowable investments. Note 1, the summary of significant accounting policies, identifies state law governing investments. The City's investment policy does not have specific limits in excess of state law on investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. The maturity date for each investment is identified above for investments held at year-end.

Credit Risk. State law limits investments to specific government securities, certificates of deposits and bank accounts with qualified financial institutions, commercial paper with specific maximum maturities and ratings when purchased, bankers acceptances of specific financial institutions, qualified mutual funds and qualified external investment pools. Note 1, the summary of significant accounting policies identifies state law governing investments. The investment policy does not have specific limits in excess of state law on investment credit risk. The rating for each investment is identified above for investments held at year-end.

Custodial Credit Risk - Investments. For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. State law does not require and the City does not have a policy for investment custodial credit risk. Of the above pooled fund investments, the City's custodial credit risk exposure cannot be determined because the pooled funds do not consist of specifically identifiable securities.

Concentration of Credit Risk. State law limits allowable investments but does not limit concentration of credit risk as identified in Note 1, the summary of significant accounting policies. The City's investment policy does not have specific limits in excess of state law on concentration of credit risk. All investments held at year-end are reported above.

The City categorizes its fair value measurements of investments within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

The City has the following recurring fair value measurements as of year-end.

- The City does not have any investments that report fair value based on quoted market prices (Level 1 inputs).
- The MBIA Michigan Class investments are valued using a pricing model utilizing observable fair value measures of fund/pool investments and other observable inputs to determining the fair value of the securities making up the of investments fund/pool (Level 2 inputs).
- The City does not has any investments that report fair value based on significant unobservable inputs (Level 3 inputs).

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

4. INTERFUND TRANSACTIONS

Transfers in and out for the year ended June 30, 2019 are as follows:

	Transfers In			
Transfers out	Local Streets	Nonmajor Governmental	Dial-a- Ride Transit	Total
General fund	\$ -	\$81,324	\$100,000	\$1 <u>81,3</u> 24
Major Streets	55.000	-	_	55,000
Library fund	,	85,000	-	85,000
Nonmajor governmental	449,738		-	449,738
Total	\$504,738	\$166,324	\$100,000	\$771,062

Transfers are used to (1) move unrestricted revenues collected in the General fund to finance various programs accounted for in other funds in accordance with budgetary authorizations and (2) move revenues from the fund that is required to collect them to the fund that is required or allowed to expend them.

5. CAPITAL ASSETS

Capital asset activity for the year was as follows:

	Balance July 1, <u>2018</u>	<u>Additions</u>	<u>Deletions</u>	Balance June 30, <u>2019</u>

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

6. PENSION PLANS

Defined Contribution Pension Plan

The City of Belding's Employee Retirement System is a defined contribution plan, which provides pension benefits to substantially all employees working more than 1,000 hours per year exclusive of those participating in the defined benefit plan. In a defined contribution plan, benefits depend solely on amounts contributed to the plan plus investment earnings. Employees are eligible to participate immediately upon employment. For employees hired prior to December 1, 2003, the City contributes 9% of each participant's base salary to the plan. The City's contributions are vested 100% upon hire. Employees hired after December 1, 2003 are required to contribute at least 2% of their base salary to be eligible for City contributions which range from 6% to 10% based on the employees contribution. The City's contributions for this employee group vest 25% per year and are 100% vested after four years. The plan provisions and contribution amounts were established by City Council and may be amended by City Council. The plan is administered by the ICMA.

During the year, the City contributed \$110,002 and plan members contributed \$59,281 to the plan.

Library employees are covered under a separate plan in which the City is contributing to separate retirement annuity accounts for three individuals. During the year, the City contributed \$7,308 and plan members contributed \$2,199 to the plan.

Defined Benefit Plan

Plan Description

The employer's defined benefit plan provides certain retirement, disability and death benefits to plan members and beneficiaries. The employer participates in the Municipal Employees Retirement System (MERS) of Michigan. MERS is an agent multiple employer, statewide public employee pension plan established by the Michigan Legislature under Public Act 135 of 1945 and administered by a nine member Retirement Board. MERS issues a publicly available financial report that includes financial statements and required supplementary information. This report may be obtained accessing the MERS website at www.mersofmich.com.

Benefits Provided

Benefits provided include a multiplier of 2.25 times final average compensation. Vesting period of 10 years. Normal retirement age is 60 with early retirement at 55 with 15 years of service. Final average compensation is calculated based on 5 years.

Membership of the defined benefit plan consisted of the following at the date of the latest actuarial valuation (December 31, 2018):

Inactive employees or beneficiaries currently receiving benefits	7
Inactive employees entitled but not yet receiving benefits	3
Active plan members	7
Total	17_

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

Contributions

The City is required to contribute an actuarially determined fixed amount, which for the current year was \$7,846 per month. Participating employees are required to contribute from 0% to 9% percent of gross wages to the Plan based on position and classification. The contribution requirements of the City are established and may be amended by the MERS Retirement Board. The contribution requirements of employees are established and may be amended by labor agreements.

Net Pension Liability

The employer's net pension liability was measured as of December 31, 2018, and the total pension liability used to calculate the net pension liability was determined by an annual actuarial valuation as of that date.

The total pension liability in the December 31, 2018 annual actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation: 2.5% (3-4% for 2014)

Salary Increases: base wage inflation of 3.75% in the long-term (plus merit and longevity from 0 to 11% based on age) (4.5 for 2014)

Investment rate of return: 7.75%, net of investment expense, including inflation (8.00% for 2014)

Mortality rates used for non-disabled plan member were based on a weighted blend of RP-2014 mortality tables of a 50% Male and 50% Female blend. Mortality rates used for disabled plan member were based on a blend of RP-2014 disabled retire mortality tables of a 50% Male and 50% Female blend of disabled retires. (1994 group annuity tables is 2014)

The actuarial assumptions used in the valuation were based on the results of the 2015 actuarial experience study.

The long-term expected rate of return on pension plan investments was determined using a model method in which the best-estimate ranges of expected future real rates of return (expected returns, net of investment and administrative expenses and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

	Target	Long-Term Expected Real	Expected Money Weighted Rate of
Asset Class	<u>Allocation</u>	Rate of Return	Return
Global Equity	57.5%	6.27%	3.60%
Global Fixed Income	20.0%	3.43%	0.68%
Real Assets	12.5%	5.48%	0.69%
Diversifying Strategies	10.0%	7.81%	0.78%
Inflation			2.00%
Administrative fee			0.25%
Investment rate of return			8.00%

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

Discount rate. The discount rate used to measure the total pension liability is 8.00% which did not change from the prior year. The projection of cash flows used to determine the discount rate assumes that employer and employee contributions will be made at the rates agreed upon for employees and the actuarially determined rates for employers. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to pay all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Changes in the Net Pension Liability

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended June 30, 2019 the employer recognized pension expense of \$174,679. The employer reported deferred outflows and inflows of resources related to pensions from the following sources:

	Deferred Outflows	Deferred Inflows	
	of Resources	of Resources	
Differences in experience	\$ 87,110	\$ -	
Differences in assumptions	29,608	-	
Excess (deficit) investment returns Contributions subsequent to the	89,215	-	
measurement date*	56,712		
Total	\$262,645	<u> </u>	_

^{*} The amount reported as deferred outflows of resources resulting from the contributions subsequent to the measurement date will be recognized as a reduction in the net pension liability for the City's year ending 2020.

Amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

2020 2021 2022 2023 2024	\$ 77,624 55,527 35,763 37,019
Thereafter Total	

7. OTHER POST-EMPLOYMENT BENEFITS

Plan Description

The City administers a single-employer defined benefit healthcare plan (the "Plan"). In addition to the retirement benefits described in Note 6, the plan provides health insurance benefits to certain retirees and their beneficiaries, which are funded on a discretionary basis. The retiree health plan does not issue a publicly available financial report and a legal trust has not been established for the plan.

Benefits provided

The plan provides health insurance premiums for retirees until death of the employee at a rate ranging from \$200 to \$400 per month based on years of service. Benefit provisions are established through negotiations between the City and bargaining units and employee groups.

Membership of the plan consisted of the following at the date of the latest actuarial valuation (June 30, 2018):

Retirees and beneficiaries receiving benefits Active plan members	6 3
Total	9

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

This Plan is closed to employees hired after January 1, 2004

Contributions

The contribution requirements of plan members and the City are established and may be amended by the City Council. The City's contributions are based on pay-as-you-go financing requirements.

Net OPEB Liability

The employer's net OPEB liability was measured as of June 30, 2019, and the total OPEB liability used to calculate the net OPEB liability was determined by an annual actuarial valuation as of that date.

The total OPEB liability in the June 30, 2019 annual actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation: Not applicable as benefit at retirement is fixed

Salary Increases: Not applicable as benefit at retirement is fixed

Discount rate: 3.0%

Healthcare cost trend rates: Not applicable as benefit at retirement is fixed

Mortality rates were based on the 2015 life tables for males or females, as appropriate, from the Social Security Administration.

The actuarial assumptions used in valuation were based on the results of the most recent actuarial experience study.

Discount rate. The discount rate used to measure the total OPEB liability is 3.0% (20 year AA/Aa tax exempt municipal bond yield). Because the plan does not have a dedicated OPEB trust, there are not assets projected to be sufficient to make projected future benefit payments of current plan members. This discount rate is used to determine the total OPEB liability.

Changes in the Net OPEB Liability

	Total OPEB Liability (a)
Balance at June 30, 2018	\$525,942
Changes for the Year: Service cost	2,701
Interest	15,432

Differences between expected and actual experience	_
Change in assumptions	8,873
Contributions	- (0 T COO)
Benefit payments, including refunds	(25,800)
Administrative expense	-
Other changes	
Net changes	1,206
Balance at June 30, 2019	<u>\$527,148</u>

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

Sensitivity of the Net OPEB Liability to changes in the discount rate.

The following presents the net OPEB liability of the employer, calculated using the discount rate of 3.0%, as well as what the employer's net OPEB liability would be using a discount rate that is 1 percentage point lower (2%) or 1% higher (4%) than the current rate.

		Current	
	1% Decrease	Discount rate	1 % increase
Total OPEB liability	\$593,424	\$527,148	\$471,214

Sensitivity of the Net OPEB Liability to changes in the healthcare cost trend rates.

The net OPEB liability is not affected by changes in the healthcare cost trend rates because the benefit is a fixed amount.

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended June 30, 2018 the employer recognized OPEB expense of \$27,006.

Defined Contribution OPEB Plan

The City of Belding's OPEB Plan is a defined contribution plan, which provides OPEB benefits to police and fire employees hired after January 1, 2004. In a defined contribution plan, benefits depend solely on amounts contributed to the plan plus investment earnings. Employees are eligible to participate immediately upon employment. Employees hired after January 1, 2004 are required to contribute 1-3% of their base salary. The City contributes 1.5% of covered wages. The City's contributions are vested 100% upon hire. Benefit provisions are established through negotiations between the City and bargaining units and employee groups. The plan is administered by the MERS. During the year, the City contributed \$5,584 and plan members contributed \$15,997 to the plan.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

Compensated absences of governmental funds are generally liquidated with General fund resources. Other post-employment benefits of governmental are generally liquidated with General fund resources.

The outstanding direct borrowings contain the following provision:

Building Authority bonds: the City shall be required to use money from its general fund or levy an ad valorem tax sufficient to pay the obligation, subject to applicable constitutional, statutory, and charter limitations.

Installment note: the entity has pledged its limited full faith and credit.

The City has pledged future sewer system total revenues, net of specified operating expenses, to repay \$1.75 million of certain sewage disposal system revenue bonds issued in 2007. Proceeds from these bonds provided financing for improvements to the sewer system. These particular bonds are payable solely from sewer system net revenues and are payable through 2027. Annual principal and interest payments on these bonds are expected to require less than 15 percent of net revenues. The total principal and interest remaining to be paid on these bonds is \$766,318. For the current year, principal and interest paid was \$103,183 and revenues were \$1,176,069.

9. TAX ABATEMENTS

The City entered into property tax abatements agreements with local businesses under the Plant Rehabilitation and Industrial Development Districts Act, (known as the Industrial Facilities Exemption). PA 198 of 1974, as amended, provides a tax incentive to manufacturers to enable renovation and expansion of aging facilities, assist in the building of new facilities, and to promote the establishment of high tech facilities. An Industrial Facilities Exemption (IFE) certificate entitles the facility to exemption from ad valorem real and/or personal property taxes for a term of 12 years as determined by the local unit of government. The agreements entered into by the City include claw back provisions should the recipient of the tax abatement fail to fully meet its commitments, such as employment levels and timelines for relocation. The IFT is computed at half the local property tax millage rate. This amounts to a reduction in property taxes of approximately 50%. For the year ended June 30, 2019 the City abated property tax revenues of approximately \$12,000.

The City entered into a property tax abatement agreement with a local organization to provide housing for low income and senior persons and families and to encourage the development of such housing by providing for a service charge in lieu of property taxes in accordance with the State Housing Development Authority Act of 1966 (1966 PA 346, as amended, MCL 125.1401, et seq, MSA 116.11-4(1), et seq). Under the agreement the organization pays 10% of annual shelter rent in lieu of taxes or the ad valorem property taxes whichever is smaller. The agreement is approved for a term dependent on the status of outstanding loans, participation in low income housing tax credits, and rehabilitation of the property. For the year ended June 30, 2019 the City abated property tax revenues of approximately \$20,000.

10. RISK MANAGEMENT

The City is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters for which the government carries commercial insurance. The City carries commercial health, dental, and optical insurance. Generally accepted accounting principles require that a liability for claims be reported if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Settled claims have not exceeded commercial insurance coverage in any of the past three fiscal years.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2019

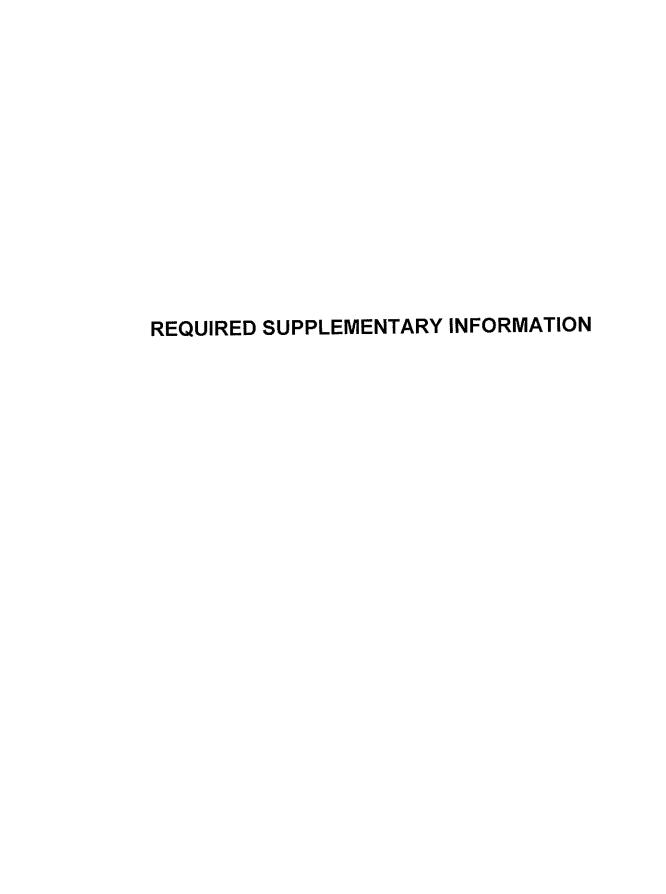

11. CONTINGENCIES

Under the terms of various federal and state grants and regulatory requirements, periodic audits are required and certain costs may be questioned as not being appropriate expenditures under the terms of the grants and requirements. Such audits could lead to reimbursement to the grantor or regulatory agencies. However, management believes such disallowances, if any, will not be material to the financial position of the City.

12. CONCENTRATIONS

The City has a significant economic dependence on a business that is a major employer and user of water and sewer services. The business accounted for \$299,722 (36%) of water sales.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

September 17, 2019

Honorable Mayor and Members of the City Council City of Belding, Michigan

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Belding, Michigan, (the "City") as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the City's basic financial statements, and have issued our report thereon dated September 17, 2019.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the City's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we do not express an opinion on the effectiveness of the City's internal control over financial reporting.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the City's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Uredoxeld Haefner LLC
